Spectre's Model 1500 transducer incorporates all of the features of the Model 1000 with the addition of a temperature output. It's large, raw sensor output (10-70X that of a bonded foil strain gauge device), Long term stability of the Model 1500 and standard RFI/EMI protection provide the most rugged and reliable transducer for industrial applications. Originally designed to withstand the rigorous testing requirements of defense and space applications, The Model 1500 offers aerospace performance to the industrial marketplace.
